OBJECTIVE

To contribute and grow in a challenging environment, while supporting the organization's success and exploring advancement opportunities.

About Me

I am a B.Tech graduate in Electronics and Communication Engineering (ECE) with a strong interest in Embedded Systems. I am currently pursuing an Embedded Systems course at Vector India, where I am learning Embedded C, Linux, TCP/IP, RTOS, 8051, ARM microcontrollers, and Generative AI. I am a quick learner, hardworking, and eager to apply my technical knowledge to real-world projects. I am looking for an opportunity to start my career and grow as an Embedded Systems Engineer.

EDUCATION

- Jawaharlal Nehru Technological University, Ananthapuramu (2023-2026)** Andhra Pradesh, India
Bachelor of Technology - Electronics and Communication Engineering
- Government Polytechnic Atmakur (SBTET) (2020-2023)** Andhra Pradesh, India
Diploma (Polytechnic) - Electronics and Communication Engineering

SKILLS SUMMARY

- Prog Languages** : C, C++, Python, Embedded C
- Hard Tools** : Proteus, Arduino IDE, Tinkercad
- Soft Tools** : PYcharm, Jupyter Notebook, Visual Studio Code, Tinkercad, MS Office
- Operating Sys** : Windows, Linux
- Soft Skills** : Problem Solving, Team work, Time Management, Critical Thinking
- Languages** : English, Urdu, Telugu, Hindi

WORK EXPERIENCE

- Seiko Denki – Chennai**
Testing: Inspected wiring for accuracy and tested connections to ensure functionality.
- Vikram Solar - Chennai**
Testing: I will inspect for any physical damage or defects. Other roles includes soldering and tape removing.
- Spark Minda - Chennai**
Supervisor: Assigned daily tasks to line workers and monitored work quality.

INTERNSHIP DETAILS

Blend Vidya IT Solutions Private Limited

Embedded & IOT Projects:

- Developed embedded and IOT projects using PIR sensors, ultrasonic sensors, and Bluetooth modules controlled through mobile phones.
- Built and tested hardware–software systems such as PWM-based motor speed control, GPS tracking, and a digital menu display system.
- Created a smart home automation system using temperature, moisture, and gas sensors for monitoring and automatic device control

Eduexpose Private Limited

IOT & Embedded Systems:

- Completed an internship in IOT and Embedded Systems, working with Arduino Uno and ESP32 using Tinkercad and Wokwi
- Developed projects such as temperature control, smart irrigation using soil moisture sensors, and bus safety systems.
- Built IOT applications with mobile app and Firebase integration for remote monitoring and control.

Skill Dzure Private limited

VLSI:

- Designed and simulated digital-circuit and VLSI-related projects including an automatic washing-machine controller and a traffic-light controller using tools like Multisim and EasyEDA.
- Developed a temperature-controller design as part of the VLSI/digital-circuit internship projects.

Besant Technologies

Python:

- Completed a Python internship at Besant Technologies, gaining hands-on experience in core Python programming.
- Worked on basic Python concepts such as data types, loops, functions, and file handling.
